TURNOVER

FROM INDUSTRY, FOR INDUSTRY

How work moves through your facility

One Program connects daily work, follow-up, planning, retained experience and governed access.

01

Operations

Keep production moving without losing the story.

1. Check the current run
Production Schedule

2. Record the condition
Operational LiveNote

3. Start technical investigation
Technical LiveNote

4. Bring in the right people
Communications

5. Make follow-up accountable
Actions

6. Hand off the live issue
Operations LiveNote

7. Find it again later
History + Timeline

02

Maintenance

Diagnose once. Preserve the investigation.

1. Take up the investigation
Technical LiveNote

2. Check previous evidence
TechNotes + Assets

3. Troubleshoot together
Communications

4. Assign remaining work
Actions

5. Find or request materials
Inventory

6. Plan recurring prevention
PM Center + Work Calendar

7. Finalize the evidence
TechNote History

8. Grow the knowledge
TurnBase + opt. Leroy

03

Engineering

Turn recurring problems into finished improvements.

1. Spot the recurring pattern
Timeline + TechNotes

2. Locate the right equipment
Assets + Repository

3. Scope the improvement
Projects

4. Assign technical deliverables
Actions

5. Plan required materials
Inventory + Project Materials

6. Coordinate execution
Work Calendar / Project Plan

7. Preserve approved changes
Repository + TurnBase

8. Check the outcome
Dashboard + Timeline

04

Management

See the work. Govern the system. Improve the next result.

1. Understand today
Dashboard

2. Find the accountable owner
My Work + Actions

3. See how the situation evolved
Timeline

4. Review safety and submissions
Safety + Forms

5. Prioritize the work
Projects + PM + Calendar

6. Maintain local control
Local Admin + Rules

7. Monitor, then follow through
Auto Alerts / optional Jobs

8. Learn from actual outcomes
Reports + TurnBase

TurnBase preserves governed knowledge. Optional Turnover Intelligence adds evidence-backed assistance and eligible recurring reporting.

Users choose and approve work within Program permissions; not every transition is an automatic sync. Safety and outside technical submissions have distinct paths.
